To Whom it May Concern:

My name is Michael Mina, and I am pleased to write this letter of recommendation for Anchal Bhamore.

I am an adjunct professor of analytics at Cleveland State University, where I teach two graduate level analytics courses, BUS 575 Introduction to Business Analytics, and BUS 602 Strategy for Business Analytics. Anchal was my student in each of these courses, in which we covered predictive modeling, decision analytical thinking, data mining, and related concepts.

Her skills include predictive modeling using Excel, SQL, and SAS Enterprise Miner. For her final project on stroke prediction, she used Tableau, Python and Excel and derived meaningful insights from raw data. Other topics we covered include how to set pricing to meet revenue and profitability goals, develop sales tools, segmentation, different types of regression, Simpson's paradox, stratified sampling, optimization, Monte Carlo simulation and others.

Anchal was consistently one of my top performers in each of these classes. She is a bright young woman, and if her performance in my classes is any indication of how she would perform in the position for which she is applying, she will be a great addition to your organization.

If I can be of any further assistance, or provide you with any further information, please do not hesitate to contact me.

Sincerely,

Michael Mina
